DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-17, drawn to composition for stone surfaces, classified in class 125, subclass 30.01.
 - II. Claims 18-20, drawn to method of restoring a stone surface, classified in class 451, subclass 41.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product, e.g., buffing or polishing a stone surface using a composition other than the one claimed in Group I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Because these inventions are distinct for the reasons given above and the search required for either Group is not required for the other, restriction for examination purposes as indicated is proper.
5. During a telephone conversation with Ms. Renee Rymarz on 09/23/03 a provisional election was made with traverse to prosecute the invention of the invention of Group I, claims 1-17. Affirmation of this election must be made by applicant in replying to this Office action.

Art Unit: 3723

Claims 18-20 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-8, 11-17 are rejected under 35 U.S.C. 102(b) as being anticipated by George et al., US Patent No. 4,738,876.

George et al. discloses all the limitations of claims 1, and 12, i.e., a composition comprising organic acid, a metal oxide (color enhancer/hardeners), and a plasticizer, e.g., linear alcohol or secondary alcohol, wherein the organic acid is about 1 to 50 weight percent (claim 3); metal oxide is about 1-50 (col. 3, last line) and the "plasticizer" is about 0 to 5 percent (claim 7).

Regarding claims 2-8, 10, 11 and 13-17, George et al. meets the limitations, e.g., dispersant, thickener (col. 3, lines 49-53 and col. 5, lines 20-37); water and wherein the composition is used to buff a stone surface.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3723

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 9 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over George et al.

George et al. discloses all the limitations of the above claim, except for the size of the metal oxides. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use the specific sizes recited, e.g., 100 nanometer, depending on the workpiece and/or operational parameters, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Conclusion

11. Prior art made of record and not relied upon are considered pertinent to applicant's disclosure. Grumbine, et al., Rolando et al., Sandusky et al., Lum et al. and Hamilton are cited to show related inventions.

12. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Hadi Shakeri at (703) 308-6279, FAX (703) 746-3279 for unofficial documents. The examiner can normally be reached on Monday-Thursday, 7:30 AM to 6:00 PM. All official documents may be faxed to (703) 872-9306.
